CASE STUDY

AMCE replaces its legacy system with Microsoft Dynamics 365 Business Central

CUSTOMER SUMMARY

Automotive Manufacturing Company of Ethiopia (AMCE) is a Joint Venture between IVECO Group (70%) and the Ethiopian Government founded in 1970 (30%). Back in 1930, FIAT introduced in Ethiopia the first truck model in history, with the 621 model and then 634 model, which gained visibility in the country. This success led FIAT to open an assembly plant in Addis Ababa with the authorization and collaboration of the Ethiopian Government from this time. AMCE is not only an assembly plant. Already some parts are being manufactured in-plant as well as in other ancillary industries in the country.

MR. BEHAILU WONDAFRASH
Chief Financial Officer of AMCE

Our systems were disconnected, and reporting was complicated and time consuming.

CHALLENGES

AMCE had been using Accpac software to manage its finance in inventory services. Systems were disconnected and they were struggling with their reporting, which was complex and took time. Plus, they were looking for a solution that could manage ongoing changes as their requirements evolved. Envisioning a high performance automotive company, AMCE's strategic leadership provided direction towards replacing its legacy system and implementing a new Enterprise Resource Planning (ERP) system, for the growth and success of the company.

SOLUTION

Unlimited Systems PLC, a Microsoft Partner in Ethiopia implemented the AMCE Dynamics ERP Project. They took AMCE live with Microsoft Dynamics 365 Business Central ERP system, to increase the company's performance and productivity and seamlessly integrate their business functions. Business Central includes customizable, configurable, sophisticated financial accounting, sales & service, supply-chain, project, manufacturing, resources management capabilities, and flexible reporting features.

MR. ANTONIO CARUSO
General Manager of AMCE

We were seeking a solution that could manage ongoing changes as our requirements evolved. We found out that Dynamics Business Central ERP system's unique solution will serve the specialized needs of AMCE and seamlessly integrates the business functions that a dynamic company requires.

BENEFITS & OUTCOMES

Dynamics 365 Business Central system eliminates duplicated administration effort. AMCE can enjoy improved collaboration between departments and its real-time reporting means strategic decisions can be made using the very latest information. With Microsoft Dynamics 365 Business Central, AMCE is offered flexibility and adaptability, as they can easily modify it to suit the business's ongoing requirements, even after implementation.

ABOUT UNLIMITED SYSTEMS

CASE STUDY

WODA gains operational efficiencies and visibility with integrated Dynamics 365 Business Central

CUSTOMER SUMMARY

WODA Metal Industry PLC is a company Incorporated in China, Japan and Co registered by law in Ethiopia in 2016, located in Sebeta City, Oromia Region, with total investment of 65,000,000 USD. WODA provides transmission tower and radio mast of many types, including self-supporting tower, guyed tower, and monopole tower. Featuring high strength, great load capacity, and safety, WODA communication towers are ideal choice for supporting antennas for telecommunications, broadcasting and television; and WODA transmission line towers are ideal for carrying overhead electricity conductors for electric power transmission.

MR. STEVEN CUI
Chief Executive Officer of WODA

In working with Unlimited Systems during the project period, the implementer has proven to be a reliable, highly professional partner, and we look forward to our expanded relationship.

CHALLENGES

WODA wanted to increase operational efficiency throughout its organization. They were looking for an ERP system that could help integrate and consolidate all company departments into a single solution.

SOLUTION

WODA has gone live with Microsoft Dynamics 365 Business Central ERP system, implemented by Unlimited Systems. Dynamics 365 Business Central offered them integration and the ability to combine the various company departments, therefore gaining visibility into the entire enterprise.

MR. MEKDIM GETACHEW
Managing Director of Unlimited Systems

The successful implementation was achieved through professional project management, adept consultants, strong partnership and commitment of the project team. We are excited to continue working with WODA to ensure that they take full advantage of all the benefits of the ERP system.

BENEFITS & OUTCOMES

With the implementation of Dynamics 365 Business Central, WODA now has improved efficiencies and better productivity, catering to the company's expanding business. A consolidated view provides visibility right across the business, for overall insights and strategic decision making. The overall project was delivered in line with the project plan and within project budget.

TRANSFORM THE WAY YOU WORK. GET RID OF INEFFICIENCY.
